Professional Profile

Full-stack Developer with experience in developing web and desktop applications using various technologies. Skilled in creating user interfaces using HTML, Bootstrap, CSS, and JavaScript (including libraries like jQuery) and in backend development with Java, C#, .Net, Python, and SQL for managing relational databases.

Laboral Experience

1 year
Santa Ana – Costa Rica

Imagine División Software
Position Held
Function Performed: I led the visual redesign of the family business website, transforming its structure from a WordPress platform to pure HTML. This change improved performance and allowed for deeper design customization. By optimizing the site's aesthetics, I achieved a more modern and professional look, enhancing user experience and consistency with brand identity.

1 year
Santa Ana – Costa Rica

Ticket Melon
Position Held
Function Performed:
I collaborated on the development of the backend for a web application for managing and selling tickets to events (concerts, live shows, etc.) using .Net. I also participated in implementing the frontend with HTML, Bootstrap, CSS, and JavaScript, ensuring its integration with the backend. Additionally, we managed the database in Azure SQL for efficient storage and handling of user and ticket information.
